

A black and white line drawing of a landscape. In the foreground, there are large, rounded rocks and some tall grass. A river flows from the left towards the right, with wavy lines indicating its surface. On the left bank, there are several tall, thin trees with dense, rounded canopies. In the background, there are rolling hills or mountains, some with jagged peaks. The sky is filled with several large, fluffy clouds. Overlaid on the river is a large mathematical equation.
$$2 - 10 = -8$$
